Day 5 - Tuesday, 10th November , 2022
Introduction to Linux command line (CLI) Tools - Plotting with gnuplot

In this exercise, the key tool(s) that you may most likelyl need are/is as listed below.:
gnuplot - search for pattern text in a file

Exercise
Write a gnuplot script that will make two(2) separate plots of Kinetic energy cutoff vrs Final enthalpy when it is run on the 3-column-data-file "***final_ry_ev.dat***" from the lecturer of Advanced linux tools(Awk and Sed)-Day 3.

First plot should have Kinetic vrs Final Enthalpy in **Ryberg**
Second plot should have Kinetic vrs Final Enthalpy in **eV**

Titles and axis labels should be made accordingly.
